**Guide to the
Moore School of Engineering Office of the Vice-Dean Records
1931-1948**

UPD 8.1

9.0 Cubic feet

Access is granted in accordance with the Protocols for the University Archives and Records Center.

ARRANGEMENT

This collection has not been fully processed. The following preliminary inventory is available.

SCOPE AND CONTENT

These records were transferred to the archives in April 1956 by S. Reid Warren, Jr., vice-dean of the Moore School. The records were from Warren's office and almost all of the material relates to his professional career prior to becoming vice-dean. For several years after the transfer, Dr. Warren removed many of the original files, particularly those relating to his research. Most of this material was sent to Francis A. Countway Library of Medicine at Harvard. Because the original inventories no longer reflected the contents of the boxes, the first eleven boxes of this collection were consolidated into five boxes, the inventory of which follows. For more material of S. Reid Warren see his personal paper collection (UPT 50 W25).
