CLASS OF 2026

270TH COMMENCEMENT MAY 18, 2026

Leaders for a Changing World

A Message from President J. Larry Jameson, MD, PhD

Welcome to the University of Pennsylvania's 270th Commencement ceremony. Penn proudly recognizes our graduates through this most venerable tradition. Today, we celebrate these extraordinary students who exemplify Penn's values, uphold its missions, and inherit the enduring legacy of our founder, Benjamin Franklin.

As valued members of Penn's scholarly community, the Class of 2026 embraces excellence, freedom of inquiry and expression, and respect. They are open-minded and curious, inventive and practical, exhibiting brilliance across fields, imperfect but self-improving, and relentlessly focused on enhancing social good. Today's graduates share these enduring values with their alma mater, and we enthusiastically present these graduates as a positive force – thoughtful and passionate leaders who are ready to navigate and improve our rapidly changing world.

They have learned, researched, invented, competed, cared, served, and grown within an academic community second to none. Our eminent faculty advance Penn's excellence across the humanities, arts, sciences, and professions, contributing powerful insights while preparing students to think critically, creatively, and to lead on issues of our time and all time.

In their years here, these students have forged a community of peers from many walks of life and from all over the world. They have learned by living with others, listening to different opinions, advocating for their ideas, and respecting diverse points of view—all invaluable preparation for this moment in time and for life.

Today, Penn's newest alumni join centuries of proud graduates who came before and have in countless positive ways helped create the world we know today. May they continue holding tight to our values of curiosity, community, and the common good. Their Penn education will serve them well, and we wish them every success in the years ahead.

Congratulations to the Class of 2026.

Commencement Seating

Guests will find this diagram helpful in locating the approximate seating of the degree candidates. The sequence in which the candidates are presented for degrees is shown on the next page. The list on page 6, detailing the colors of the candidates' hoods according to their fields of study, may further assist guests in identifying the locations of the various schools.

In case of emergency, evacuation procedures will be announced.

The National Anthem

Noah Milad, C’26
Oh, say, can you see, by the dawn’s early light,
What so proudly we hailed at the twilight’s last gleaming?
Whose broad stripes and bright stars, thro’ the perilous fight
O’er the ramparts we watched, were so gallantly streaming.
And the rockets’ red glare, the bombs bursting in air,
Gave proof through the night that our flag was still there.
Oh, say, does that star-spangled banner yet wave
O’er the land of the free and the home of the brave?

The Red and Blue
By William J. Goeckel, Class of 1896, and Harry E. Westervelt, Class of 1898
Come all ye loyal classmates now, in hall and campus through,
Lift up your hearts and voices for the royal Red and Blue.
Fair Harvard has her crimson, old Yale her colors too,
But for dear Pennsylvania, we wear the Red and Blue.
(Chorus)
Hurrah! Hurrah! Pennsylvania!
Hurrah for the Red and the Blue;
Hurrah! Hurrah! Hurrah! Hurrah!
Hurrah for the Red and the Blue.

Academic Regalia and Traditions

May 18, 2026 – the University of Pennsylvania’s 270th Commencement. Penn traces its origins to a deed of trust executed in 1740 and is celebrating its 286th birthday this year. Bachelor’s, master’s, and doctoral degrees will be conferred upon some 6,000 graduates of the University’s 12 schools. Honorary degrees will be awarded to five individuals of distinction in varied fields, as you will note on pages 11-13 of this program.

The practice of sporting signs on caps and gowns as a form of public proclamation at Commencement dates to the early 1760s and recalls an even more ancient tradition, originating in the practice of medieval universities. Penn’s archives contain several 18th century broadsides, printed in Latin, which were distributed to Commencement guests along with the regular programs. The broadsides contain a series of propositions classified under various academic headings. Presumably, the graduating students were willing to defend these theses against any assertions to the contrary. On the eve of the Revolution, however, statements such as “the rights of the people are as divine as the rights of their rulers” must have met with widespread sympathy.

Academic Ceremony and Regalia

Commencement exercises at American universities and colleges traditionally are composed of three essential elements: the Academic Procession, the conferring of degrees, and the Commencement address. This practice has been codified since 1895, when a national conference on academic costume and ceremony was proposed and a plan known initially as the “Intercollegiate System” was formally adopted. The Trustees of the University of Pennsylvania incorporated this code into the Statutes of the University in November 1896. Now under the aegis of the American Council on Education, the “Academic Costume Code and Academic Ceremony Guide” was revised in 1932 and 1960.* Throughout the 20th century, and today, Commencement at Penn has, with minor modifications, followed the dictates of the code and its revisions.

By 1896, however, Penn had been granting degrees for nearly 140 years. Like other American colonial colleges, Penn borrowed its 18th century Commencement rituals directly from the English universities. In England the

history of academic dress reaches back to the early days of the oldest schools. As early as the second half of the 14th century, the statutes of certain colleges prohibited “excess in apparel” and required the wearing of a long gown. It is still an open question as to whether academic dress finds its sources chiefly in ecclesiastical or in civilian dress. It is often suggested that gowns and hoods were the simplest, most effective method of staying warm in the unheated, stone buildings that housed medieval scholars. In any case, academic regalia had evolved to contemporary familiarity by the time Benjamin Franklin was awarded an honorary Doctor of Laws by the University of St. Andrews in 1759.

Traditions and Current Practice at Penn

In April 1887, on the recommendation of a committee of the faculty, the Trustees adopted the “‘Pennsylvania’ System of Academic Costume.” The colors and trimmings of hoods and caps were regularized according to faculty and degree. Beginning with the Commencement of 1887, the “‘Pennsylvania’ System” was published in each year’s program and adherence to its rules was expected of Trustees, faculty, and students alike. Beginning in 1896, the “‘Pennsylvania’ System” was superseded by the “Intercollegiate System,” which has continued in effect to the present time.

The gowns used in American academic ceremonies vary according to the highest degree awarded to the wearer. The gown for the bachelor’s degree has pointed sleeves; it is designed to be worn closed. The gown for the master’s degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut and the front has an arc cut away. The master’s gown may be worn open or closed. The doctoral gown is a more elaborate

costume faced down the front with black velvet and across the sleeves with three bars of the same; these facings and crossbars may be of velvet of the color distinctive to the field of study to which the degree pertains. The doctoral gown has bell-shaped sleeves and may be worn open or closed. Some institutions have authorized doctoral gowns in colors other than the customary black; holders of the University of Pennsylvania doctorate may wear red and blue gowns.

The hoods are lined in silk with the official color or colors of the college or university which granted the highest degree held by the wearer; more than one color is shown by division of the field color in a variety of ways, such as by chevron or chevrons. The binding or edging of the hood is in velvet, with widths of two inches, three inches, and five inches for the bachelor’s, master’s, and doctoral degrees, respectively. The color of the border indicates the field of study to which the degree pertains. University of Pennsylvania graduates wear a hood lined in red with a blue chevron. The mortarboard cap is standard, though soft square-topped caps are permissible. Recipients of doctorates may wear a gold tassel fastened to the middle point of the top of the cap; all others wear black.

Degrees shall be conferred today according to the following order:

Arts & Letters, *white*
Science, *golden yellow*
Business Administration, *mustard*
Nursing, *apricot*
Medicine, *green*
Law, *purple*
Fine Arts (including Design), *brown*
Dental Medicine, *lilac*
Veterinary Medicine, *gray*
Education, *light blue*
Social Work, *citron*
Philosophy, *dark blue*

*This and additional material which follows is taken from “An Academic Costume Code and Academic Ceremony Guide” in American Council on Education, *American Universities and Colleges*, 14th ed. (New York: Walter de Gruyter, 1992).

Academic Procession

The order for today's Academic Procession is as follows:

- Mace Bearer
- President and Provost
- Chair, Board of Trustees
- Commencement Speaker
- Candidates for Honorary Degrees
- Deans
- Trustees
- Officers of the University
- Faculty
- Advisors

University Mace

The Secretary of the University carries the University mace, the symbol of authority of the University, at the head of the Academic Procession. It was a gift from the family of William Murray Gordon, MD 1910. It is adorned with the seal and arms of the University, the Penn and Franklin coats-of-arms, a depiction of the Rittenhouse Orrery, and a thistle symbolizing the early ties of the University with Scotland.

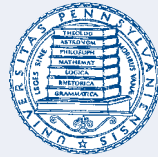

President's Badge of Office

The President's badge of office is a silver medallion of which one face is engraved, like the mace, with the University seal. The obverse of the President's medal bears the "orrery seal," designed in 1782 by Francis Hopkinson, AB 1757, a signer of the Declaration of Independence. The medal, suspended on a chain composed of silver links, was given by the late Trustee Thomas Sovereign Gates, Jr., AB 1928, LLD 1956, on the occasion of Sheldon Hackney's inauguration as President in October 1981.

UNIVERSITY SEAL AND SYMBOLS

SEAL OF THE CORPORATION

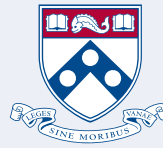

The Trustees of the University have an official seal that is, in effect, the signature of the Corporation. It had its origin at a meeting of the Board of Trustees in 1755 with Benjamin Franklin as Chair. Though the seal underwent changes over the years, the most recent design, approved in 1932 and adopted in 1933, returned it to virtually its original form.

The seal is composed of seven books stacked on a slanted desktop, with the books bearing the following titles, representing the curricula of the day: *Theolog*, *Astronom*, *Philosoph*, *Mathemat*, *Logica*, *Rhetorica*, *Grammatica*. On the periphery of the stack of books appears the University motto, *Leges Sine Moribus Vanæ*, and the whole is encircled with the inscription, *Universitatis Pennsylvaniaensis*.

MOTTO: LEGES SINE MORIBUS VANÆ

The motto of the University, *Leges Sine Moribus Vanæ*, means "Laws without morals are useless." It comes from the longer quotation from Horace, "*Quid leges sine moribus vanae proficiunt?*" the sense of which is "Of what avail are empty laws without (good) morals?"

PENN COAT-OF-ARMS

The Penn coat-of-arms was derived by combining the coat-of-arms of Benjamin Franklin and that of William Penn's family. The dolphin on the red chief was part of Franklin's coat-of-arms and the three silver plates on a blue chevron were part of Penn's. The two were combined on a white shield along with two open volumes representing the University's educational purpose.

SCHOOL COLORS

Eighteenth century American academic institutions did not have colors. The earliest known representation of the combined Penn colors, red and blue, is on the incised lid of the 1871 College Hall cornerstone.

One legend traces their origins to an early track meet at Saratoga, New York, between Penn, Harvard, and Yale. When asked by the officials what colors would be representing the Penn team, the Pennsylvania captain reportedly replied, "We're going to be wearing the colors of the teams we beat," i.e., Harvard Crimson and Yale Blue. We shall assume that Penn was victorious and thus remained loyal to the Red and Blue.

Schools of the University

School of Arts and Sciences (1755)

The School of Arts and Sciences (SAS) is the direct descendant of the College of Philadelphia, where Benjamin Franklin established the first modern arts and sciences curriculum in the English colonies. Undergraduate programs for men date to the chartering of the College in 1755; the College of Liberal Arts for Women was founded in 1933. The Graduate School was established in 1882 with the appointment of a Faculty of Philosophy. The College of Liberal and Professional Studies (lifelong learning) traces its roots to 1892. The School of Arts and Sciences was born in 1974 with the merger of the College of Arts and Sciences, the College for Women, the Graduate School, and four social science departments from Wharton. Today, SAS is the largest of the University's 12 schools, providing a liberal arts education for all Penn undergraduates and supporting graduate studies, basic research, and continuing education across the full range of the humanities, natural sciences, and social sciences. The School has 28 departments with 521 standing faculty, 34 research centers, 6 interschool institutes, and 10,226 students.

Perelman School of Medicine (1765)

Established in 1765 as the nation's first medical school, what is now known as the Raymond and Ruth Perelman School of Medicine at the University of Pennsylvania continues a rich tradition of providing the nation's best medical training and education, with service to its community as a cornerstone. Today, the School honors its longstanding commitment to advancing knowledge and improving health close to home and across the world through research, patient care, and the education of trainees in a community that fosters innovation, stimulates critical thinking, embraces equal opportunity, and supports lifelong learning. More than 760 students are pursuing medical degrees in the Perelman School of Medicine, more than 1,060 are studying toward doctorates in biomedical sciences (with more than 240 enrolled in joint MD/PhD programs), and more than 620 students are pursuing professional master's degrees. Across the School's

affiliated hospitals, 1,445 residents and fellows are completing their medical training. Over the past decade, the Perelman School of Medicine has consistently been among the top recipients of research funding from the National Institutes of Health.

Penn Carey Law School (1790)

Penn's dedication to innovative legal education began in 1790, when founding father James Wilson — signer of the Declaration of Independence, framer of the U.S. Constitution, and one of the original U.S. Supreme Court Justices — delivered a series of lectures to President George Washington and his cabinet. In 1850, George Sharswood established a formal legal instruction program, and in 1900, after several years of holding classes across the city of Philadelphia, the School established its current location at 34th and Chestnut Streets. Today, the University of Pennsylvania Carey Law School provides a cross-disciplinary, globally focused legal education taught by preeminent scholars and internationally renowned experts in their fields. Nearly half of its faculty hold advanced degrees in addition to law, and half hold joint or secondary appointments at schools across the University. In the 2025-26 academic year, Penn Carey Law has close to 1,000 students — many of whom are earning joint degrees and certificates of study in fields outside of the law — and more than 70 full-time faculty. Penn Carey Law awards five degrees: juris doctor; master of laws for internationally trained lawyers; master of comparative law; doctor of the science of law; and master in law for non-lawyers.

School of Engineering and Applied Science (1852)

Founded in 1852 as the School of Mines, Arts and Manufactures, the School of Engineering and Applied Science is Penn's intellectual home of technology-related teaching and research. For 173 years, Penn Engineering has been a vibrant and collaborative community of innovation. World-acclaimed faculty, state-of-the-art research laboratories, and highly interdisciplinary curricula offer students an unparalleled learning experience. From the time ENIAC,

the world's first computer, was developed and introduced on campus in 1946, Penn Engineering has continued a tradition of leadership and cutting-edge research. Innovation and technology drive its every program and Penn engineers play a critical role in posing and answering the questions that will improve the human condition and transform the world. The Penn Engineering community is as robust as it has ever been with 162 tenure-track faculty, 21 research and practice professors, 19 lecturers, 259 staff, approximately 1,887 undergraduates, 1,949 master's students, and 998 doctoral students.

Stuart Weitzman School of Design (1869)

Although the School of Design dates its founding from 1890, architecture courses were first offered at the University of Pennsylvania in 1869, making Penn's architecture program the second oldest in the United States. In 1921, the Department of Architecture joined with the Department of Music and Fine Arts to create an independent undergraduate School of Fine Arts modeled on the French École des Beaux Arts. In 1958, the School was renamed the Graduate School of Fine Arts, reflecting the shift to graduate degree offerings in architecture, city and regional planning, landscape architecture, and fine arts. In the 1980s, a program in historic preservation was added. To more accurately capture the School's sphere of influence, it was renamed the School of Design in 2003. In recognition of both his lifetime philanthropic support of Penn and his engagement with its academic activities, the School was named for award-winning designer and footwear icon Stuart Weitzman, W'63, in February of 2019. Today, with a faculty of more than 200 leading researchers and practitioners, and more than 700 students from around the world, the School prepares students to address complex sociocultural and environmental issues through thoughtful inquiry, creative expression, and innovation.

School of Dental Medicine (1878)

Established in 1878 as the Dental Department of the University of Pennsylvania, the School of Dental Medicine is among the oldest university-affiliated dental institutions in the country with a history deeply rooted in forging precedents in dental education, research, and patient care. In 1897, Thomas W. Evans, a Philadelphia native and clinician who spent most of his life in France as the dentist to European nobility, left his estate to create a dental school that was “second to none.” Evans’ bequest would become one with the University, creating the Thomas W. Evans Museum and Dental Institute, which opened in 1915. Today, the Evans Building remains the site of much of the School’s clinical instruction. The dental campus also includes the Robert Schattner Center and the Leon Levy Center for Oral Health Research, home to the basic sciences and extensive research activities.

Penn Dental Medicine is a major provider of care in West Philadelphia through outreach clinical programs. In 2025, students completed over 60,000 hours of care for patients at clinics in the surrounding Philadelphia neighborhoods.

Penn Dental Medicine offers the degrees of doctor of dental medicine (DMD), master of science in oral biology (MSOB), master of oral health sciences (MOHS), master of advanced dental sciences (MADS), master of science in oral and population health (MOPH), and doctor of science in dentistry (DScD). It trains postdoctoral students in advanced general dentistry, endodontics, oral medicine, oral and maxillofacial surgery, orthodontics, pediatric dentistry, periodontics, periodontics/orthodontics, periodontal/prosthesis, and prosthodontics.

In the 2025-2026 academic year, Penn Dental Medicine has 761 DMD students, 27 students in the MSOB program, 6 in the MOHS program, 1 in the MADS program, 10 in the MOPH program, 6 in the DScD stand-alone program, and 15 in the DScD plus certificate programs.

Penn Dental Medicine has over 500 faculty members, including 113 full-time faculty.

Wharton School (1881)

Founded in 1881 as the world’s first collegiate business school, the Wharton School of the University of Pennsylvania is shaping the future of business by incubating ideas, driving insights, and creating leaders who change the world. With a faculty of more than 230 renowned professors, Wharton has over 5,000 undergraduate, MBA, executive MBA, and doctoral students. Each year, the School welcomes 13,000 professionals from around the world who advance their careers through Wharton Executive Education’s individual, company-customized, and online programs. Today, more than 100,000 Wharton alumni form a powerful global network of leaders who transform business every day.

School of Veterinary Medicine (1884)

Ranked among the top ten veterinary schools worldwide, the University of Pennsylvania School of Veterinary Medicine (Penn Vet) is a global leader in veterinary education, research, and clinical care. Founded in 1884, Penn Vet is the first veterinary school developed in association with a medical school. The School is a proud member of the One Health Initiative, linking human, animal, and environmental health.

Penn Vet serves a diverse population of animals at its two campuses, which include extensive diagnostic and research laboratories. Ryan Hospital in Philadelphia provides care for dogs, cats, and other domestic/companion animals, handling more than 30,000 patient visits each year. New Bolton Center, Penn Vet’s large-animal hospital on nearly 700 acres in rural Kennett Square, Pennsylvania, cares for horses and livestock/farm animals. The hospital handles 6,300 patient visits a year, while New Bolton Center’s ambulatory Field Service traveled nearly 183,000 miles administering care to more than 22,400 animals at local farms. In addition, New Bolton Center’s campus includes a swine center, working dairy, and poultry unit that provide valuable research for the agriculture industry.

Graduate School of Education (1914)

The University of Pennsylvania Graduate School of Education (Penn GSE) is one of the nation’s leading schools of education, consistently producing vanguard research and influential scholars, practitioners, and educational leaders. The University created its first professorship in education in 1894, followed by the establishment of a full School of Education in 1914. Its first six degree recipients—three women and three men—earned their bachelor of science in education in 1915. The School was reorganized and formally renamed the Graduate School of Education in 1961, and in 1971 launched its Administrative Leadership Program, the first of many groundbreaking leadership offerings. Today, Penn GSE offers over 35 programs across the field, preparing students to become impactful educators, scholars, counselors, policymakers, and leaders in K–12, higher education, and professional learning settings. Its faculty are internationally recognized for rigorous, practice informed scholarship, and its 20,000 alumni work in more than 100 countries. Home to the first Education Entrepreneurship master’s program in the world and the McGraw Prize in Educational Leadership, the School is a pioneer in educational innovation and entrepreneurship, shaping new approaches that respond to today’s most urgent challenges, from supporting the education workforce to advancing ethical AI-engaged teaching and learning. Rooted in the belief that education drives opportunity and strengthens democratic society, Penn GSE is deeply engaged in Philadelphia and around the world. Students and faculty partner with schools and community organizations across the city, country, and globe, advancing research, policy, and educational practice.

School of Nursing (1935)

Nursing education at Penn began in 1886 when the Hospital of the University of Pennsylvania started a nurse training program. In 1935, the Trustees of the University of Pennsylvania established a nursing degree program within the School of Education, and in 1950 the School of Nursing was established. The master of science in nursing program was instituted in 1961, the doctor of nursing science program in 1978, the doctor of philosophy program in 1984, and the doctor of nursing practice program in 2016. The School added a

master of science in nutrition science degree in 2023. To accelerate a path to a career in nursing for non-nurses, the School added the master of professional nursing degree in 2024. These innovations and a curriculum which progressively reflects changing health care delivery patterns have advanced the School into the first rank of American schools of nursing. The School has two departments, Biobehavioral Health Sciences and Family and Community Health. It is widely recognized for its leadership in nursing research in the areas of health outcomes and policy research, nursing history, biobehavioral health sciences, global women's health, health equity, aging, and transitions in health. It also has a global reputation for innovations in nurse-managed clinical practice and is a World Health Organization Collaborating Center for Nursing and Midwifery Leadership. For nine consecutive years, the School has been ranked the number one nursing school in the world by QS World University. The School of Nursing has 61 standing faculty and 1,200 students.

School of Social Policy & Practice (1948)

For more than 110 years, the School of Social Policy & Practice (SP2) has been a powerful force in the world, working towards social good and social change through education, research, and practice. The School began in 1908 as part of the Children's Bureau of Philadelphia and became affiliated with the University of Pennsylvania in 1935. The School formally merged with the University in 1948 to become the School of Social Work. In 2005, the School's name was changed to the School of Social Policy & Practice to reflect a broader mission that today includes five top-ranked degree programs — master of social work, master of science in social policy, master of science in nonprofit leadership, doctorate in clinical social work, and doctor of philosophy in social welfare — along with certificate programs and dual degrees. Dedicated to producing social change agents — policy makers, practitioners, educators, and activists — the rigorous curriculum includes community engaged learning across Philadelphia and beyond. Among SP2's transdisciplinary and collaborative research centers and initiatives are the Center for Guaranteed Income Research, the Ortnier Center on

Violence and Abuse, the Field Center for Children's Policy, Practice, & Research, Actionable Intelligence for Social Policy, Health Equity Lab, the Center for High Impact Philanthropy, the Center for Social Impact Strategy, SAFElab, Penn Center on Inclusive Innovation and Technology, and the Center for Climate Adaptation and Resilience. The School has 27 standing faculty, several research faculty, and approximately 510 graduate students.

Annenberg School for Communication (1959)

For more than 65 years, the Annenberg School for Communication at the University of Pennsylvania has been at the forefront of a dynamic, ever-changing field. Founded through the generosity and vision of diplomat and philanthropist Walter H. Annenberg, the School is devoted to furthering the understanding of the role of communication in public life through research, education, and service.

At the School's founding, Ambassador Annenberg identified its unique mission: "Every human advancement or reversal can be understood through communication. The right to free communication carries with it the responsibility to respect the dignity of others — and this must be recognized as irreversible. Educating students to communicate this message effectively and to serve all people is the enduring mission of this school."

The Annenberg School has remained true to Ambassador Annenberg's mission while responding to changes in both the nature of communication as a social process and as a discipline and interdisciplinary field of study.

With strengths in health communication, politics and policy, cultural inquiry, and computational social science, the Annenberg School is one of the top communication schools in the nation. It has 25 standing faculty members, 30 additional research and teaching faculty and associates, 71 graduate students, and over 150 undergraduate communication majors. The School offers a doctor of philosophy degree and a bachelor of arts major, which is run through the College of Arts and Sciences. The School will welcome the first cohort of the master's of communication and media industries program this fall.

The School is also home to the Annenberg Public Policy Center and many other centers, labs, and projects pursuing innovative communication research and teaching.

Carolyn Bertozzi

As a glycobiology scientist, you study sugar molecules—the highly complex structures that cover every cell in all living organisms. Though ubiquitous, exactly how these molecules regulate cellular processes and affect human health remains largely unknown. You are dedicated to unraveling this mystery, making discoveries that advance medicine and earning you the 2022 Nobel Prize in Chemistry, which you shared with K. Barry Sharpless and Morten Meldal. As a pre-med major at Harvard, you took the infamous organic chemistry course. To your surprise, you not only enjoyed it but also excelled—it came naturally. That experience marked the beginning of your path to becoming a chemical biologist, culminating in a doctoral degree in chemistry from the University of California, Berkeley.

At Berkeley, you were introduced to the study of sugars and later launched your own lab. In the late 1990s, you invented “bioorthogonal chemistry,” a powerful tool that allows scientists to image cell-surface sugars and better understand their function. Since then, applications of your innovation have expanded across biological research and into the development of cancer therapies.

As an entrepreneur, you have co-founded 12 biotechnology companies, advancing translational research for therapies targeting cancer, neurological disorders, and autoimmune diseases. You are also addressing rare diseases. In collaboration with a Stanford alumnus whose daughter was born with the rare genetic disorder NGLY1 deficiency, you founded Grace Science, where a promising gene therapy is currently being tested.

Today, you are the Anne T. and Robert M. Bass Professor of Chemistry and Professor of Chemical and Systems Biology and Radiology (by courtesy) at Stanford University, as well as an Investigator of the Howard Hughes Medical Institute. Your many honors include the Welch Award in Chemistry, the Heineken Prize for Biochemistry and Biophysics, the Lemelson–MIT Prize, and a MacArthur Foundation Fellowship. You

also received the 2024 Priestley Medal from the American Chemical Society.

Your life as a scientist has long included a commitment to social activism, ignited during your Harvard years, which coincided with the AIDS crisis. Thousands were dying, including your friends. As a member of ACT UP (AIDS Coalition to Unleash Power), you helped advocate for research, policy change, and patient rights to benefit AIDS patients. You continue to serve as a role model and champion for LGBTQ+ members of the scientific community, ensuring that your Stanford lab is an open and equitable space for all.

For your remarkable curiosity, creativity, and perseverance in making groundbreaking discoveries in glycoscience and its implications for human health—and for your leadership in translating scientific findings into medical therapies that provide hope for patients and their families around the world—the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Carolyn Bertozzi, the degree of Doctor of Sciences, *honoris causa*.

Michael Beschloss

Two hundred fifty years ago, only blocks from the University of Pennsylvania’s original campus, our founder Benjamin Franklin helped draft the Declaration of Independence. As you have reminded us, Franklin and his co-authors understood the great value of knowing history and the lessons it imparts—an idea that has been the cornerstone of your renowned career as a historian, author, and scholar of leadership.

Growing up in Chicago, at the age of seven you visited Abraham Lincoln’s home in Springfield, Illinois, a trip that inspired your passion. “From that point on I really wanted to become a historian and to write about presidents,” you have said. True to your childhood dream, you majored in history at Williams College, where you wrote a senior thesis that would become your first book—*Kennedy and Roosevelt*—published at the age of 24. You went on to earn a master’s in business administration at Harvard where you studied leadership.

Since then, you have crafted a prolific career as an insightful source of knowledge and an expert on key figures in our nation’s past, spurring your fellow citizens, presidents among them, to learn history and appreciate its relevance. As an author, you present fresh perspectives in bestselling books such as *Presidential Courage: Brave Leaders and How They Changed America 1789-1989*, and *The Conquerors: Roosevelt, Truman and the Destruction of Hitler’s Germany, 1941-1945*. Meticulously, you listened to hundreds of hours of tape secretly recorded by Lyndon Johnson and transformed them into two compelling volumes, *Taking Charge: The Johnson White House Tapes, 1963–1964*, and *Reaching for Glory: Lyndon Johnson’s Secret White House Tapes, 1964–1965*. You collaborated with Caroline Kennedy on the publication of *Jacqueline Kennedy: Historic Conversations on Life with John F. Kennedy*, for which you wrote the introduction and annotations, providing the reader with critical context.

You have served as a trusted voice for millions as NBC News Presidential Historian and as a contributor to the PBS NewsHour. Your skilled analysis has extended beyond politics, as in the *New York Times* columns in which you wrote about sports, cars, technology, and more.

As a scholar, you have held appointments in history at the Smithsonian Institution, St. Antony’s College (Oxford), and the Harvard Russian Research Center. You have served on the boards of the National Archives Foundation, the White House Historical Association, the Thomas Jefferson Foundation, and the President’s Commission on White House Fellowships.

With profound gratitude for your purposeful life’s work, dedicated to the study of American history and leadership which explores the past to inform a nation’s present and inspire its future, and enlightens the public with essential stories that offer knowledge and wisdom for generations to come, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Michael Beschloss, the degree of Doctor of Letters, *honoris causa*.

James Corner

The roots of your celebrated career in landscape architecture were established at the University of Pennsylvania, where you earned a master of landscape architecture and an urban design certificate. In 1990, you joined the Penn faculty and began, as you have said, “figuring out how to dramatize the public realm and enrich the lives of people who live in cities—a lot of these ideas were developed in my early years teaching at Penn, using the school as a design laboratory.”

Your innovative vision for shared urban spaces can be seen around the world. They are the creations of Field Operations, the design firm you founded in 1999. The most famous, and one of your first, is New York City’s High Line, an abandoned, elevated railway that you transformed into a one-and-a-half-mile promenade and garden, enjoyed by millions every year.

From the Philadelphia Navy Yard to San Francisco’s Presidio Tunnel Tops, Seattle’s new waterfront, Hong Kong’s Victoria Dockside, and London’s Olympic Park—and many places in between—your city landscapes draw people together. They are urban magnets for socializing, exercising, relaxation, and embracing the outdoors, all the while invigorating local economies and honoring urgent ecological and climate adaptation needs.

Growing up outside of Manchester, England, you learned to appreciate the city and nature in equal parts. You earned a bachelor’s degree with first class honors from Manchester Metropolitan University. After graduating from Penn in 1986, you worked briefly in private practice, before returning to the University as a studio teacher, advancing to full Professor, and being appointed as Chair of the Department of Landscape Architecture, a post you held from 2000 to 2013. Your teaching and scholarly writing, both theoretical and practical, have made major and lasting contributions to the field. Today, you are the Professor Emeritus of Landscape Architecture and Urbanism at Penn’s Weitzman School of Design.

Your honors reflect a remarkable career. In 2021, you were elected to the American Academy of Arts and Letters, considered the highest form of recognition of artistic merit in the

United States. You received the 2024 Sir Geoffrey Jellicoe Award in Landscape Architecture from the International Federation of Landscape Architects, the preeminent award for landscape architects and the organization’s highest honor. Among many achievements, you received the American Society of Landscape Architects’ National Design Medal (2023); the Richard Neutra Award for Design Excellence (2023); and the American Academy of Arts and Letters Award in Architecture (2011).

For a life devoted to the reimagination of what cities can be, envisioning their potential and bringing those ideas to life for the benefit of humanity, and for your influential scholarship which inspires students as they endeavor to transform our world through the mastery of the arts of landscape architecture and urban design, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, James Corner, the degree of Doctor of Arts, *honoris causa*.

Claudia Goldin

The economic role of American women in the workforce had gone largely overlooked until you focused on women and gender in your research as an economic historian and labor economist. In 2023, you received the Nobel Prize in Economics “for having advanced our understanding of women’s labour market outcomes.” You are the third woman to win the distinguished award, and the first as a solo recipient.

A native New Yorker, you attended the prestigious Bronx High School of Science and headed to Cornell University to study bacteriology. But it was economics that piqued your interest, which led you to graduate school at the University of Chicago, whose economics faculty at the time included five future Nobel laureates.

At Chicago, you learned the importance of looking at economics from a historical perspective, and you have spent much of your career delving into archives to understand how and why the female labor force has evolved. Some of your most fruitful research took place at the University of Pennsylvania, where you were on the faculty from 1979 to 1990. Through colleagues, you learned that somewhere in the very location where you worked—the McNeil Building—sat boxes of surveys from 1951, collected

by social statistician Gladys Palmer. You found the boxes, along with critical data about the World War II-era female labor force. You remember it as one of your eureka moments.

The first of your nine books, *Understanding the Gender Gap: An Economic History of American Women*, is considered a foundational text. With your husband and fellow Harvard economist, Lawrence F. Katz, you wrote *The Race between Education and Technology*, a history of America’s education system and its impact on the wage structure. Your 2021 book, *Career and Family: Women’s Century-Long Journey toward Equity*, explores gender earnings equality.

Following your Penn years, you joined Harvard University where you became the first female tenured economics professor. Today, you are the Samuel W. Morris University Professor and Henry Lee Professor of Economics. The recipient of numerous teaching awards, you have described your students, “who push me to the frontiers of knowledge every day,” as indispensable to your work.

In addition to the Nobel, you received the Erwin Plein Nemmers Prize in Economics in 2020 and the BBVA Foundation Frontiers of Knowledge Award in 2019. You have devoted many years to the National Bureau of Economic Research, the non-partisan network of academic economists which researches and analyzes major economic issues.

In recognition of your outstanding contributions, merging economics and history to illuminate our understanding of women’s role in the labor economy, and developing the critical framework for current and future economists who will continue the study of this important subject, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Claudia Goldin, the degree of Doctor of Laws, *honoris causa*.

Ann Hobson Pilot

Your extraordinary life in classical music began in your native Philadelphia. Your mother, a concert pianist, began teaching you to play at the age of six. But as a teen, you were eager to play an instrument all your own, and at the suggestion of your music teacher at the Philadelphia High School for Girls, you gave the harp a try.

You loved it from the start and possessed a rare gift that earned you a full scholarship to the prestigious Cleveland Institute of Music, where you studied with the legendary harpist, Alice Chalifoux. As a professional, your star rose quickly. In 1966, you joined the National Symphony Orchestra as principal harpist, and three years later, at age 26, you were recruited by the Boston Symphony Orchestra. Thus began your illustrious, four-decade career with the orchestra, including 28 years as its principal harpist and its first Black principal player. You were the first Black woman to be named principal player of a major orchestra.

You have worked with the world's greatest conductors, performed with orchestras around the globe, and recorded music as a soloist and with ensembles. Inspiring generations of young artists, you were on faculty at Boston University and the New England Conservatory of Music and served as Director of the Young Artists Harp Program for the Boston University Tanglewood Institute. Your story is the subject of a PBS film, "A Harpist's Legacy: Ann Hobson Pilot and the Sound of Change," which documents your journey to South Africa, where you explored the origins of the harp and soloed with the National Symphony of Johannesburg.

As a young harpist playing in a field with long-established race and gender barriers, you pioneered a path with talent and fortitude, proving that you belonged among the very best even though you were not always treated as such. Through the years, you have helped to create opportunities for young Black musicians, encouraging their creativity by supporting organizations, such as Project STEP (String Training Educational Program), that promote inclusivity in classical music.

In 2009, you took your final bow with the Boston Symphony. For the occasion,

legendary conductor, composer, and your fellow Penn Honorary Degree recipient John Williams wrote "On Willows and Birches, Concerto for Harp," which you premiered at the orchestra's opening concert that year at both Symphony Hall and Carnegie Hall. Maestro Williams called you "one of the greatest harpists we have ever had."

With admiration for your unparalleled excellence as an internationally renowned classical harpist, for sharing the singular sound of your music with global audiences, and for serving as a devoted teacher and mentor for the next generation, encouraging the pursuit of their musical passions, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Ann Hobson Pilot, the degree of Doctor of Music, *honoris causa*.

As final action cannot always be taken by the time this program goes to press, these lists of degree recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student's name herein does not necessarily mean that the person has not been awarded a Penn degree. The student's transcript is the official record of the University.

As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student's name herein does not necessarily mean that the person has not been awarded a Penn degree. The student's transcript is the official record of the University.

As final action cannot always be taken by the time this program goes to press, these lists of degree recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student's name herein does not necessarily mean that the person has not been awarded a Penn degree. The student's transcript is the official record of the University.

As final action cannot always be taken by the time this program goes to press, these lists of degree recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student's name herein does not necessarily mean that the person has not been awarded a Penn degree. The student's transcript is the official record of the University.

Note: As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The student's transcript is the official record of the University.

As final action cannot always be taken by the time this program goes to press, these lists of degree recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student's name herein does not necessarily mean that the person has not been awarded a Penn degree. The student's transcript is the official record of the University.
